Miners to Open 1940 Conference Campaign Tonight

**Invade Maryville For
Game with Defending
MIAA Champions**

The Miners journey to Maryville this week-end to engage the powerful Maryville Teachers Friday night. The Miners after holding the St. Louis University Billikens to a 0-0 deadlock look like the team that can stop the Bearcats winning streak of twenty-two consecutive victories. In last year's game the Miners were defeated by the Teachers 17-0.

The Miners, who played an uphill battle in their hard fought encounter with the Bills, will probably suffer the loss of Clyde Murphy, first squad center. Murphy and Leone both are suffering from twisted knees and are not expected to see action. Coach Bullman will employ the services of Mer Kiburz, 163 pound sophomore, to replace Murphy. Shumacher, Veale, Kromka, and Cunningham also are convalescing

The score of the Miner-Maryville game will be received at the office of the Rolla New Era by quarters. Fans may receive the score by calling 110 or 714 after about 9 o'clock tonight.

from injuries sustained in Friday's game, but they will be on hand for action.

The Maryville Teachers, current champions of the M. I. A. A. conference, who last Saturday defeated the Washington University Bears 7-6 on a lateral to Bennet and a conversion by Kurtwright have a dangerous team. Walker, Maryville's right end, is an extremely fine defensive man. The Bearcats will rely on Captain Kurtwright for their passing. Schottel or Padilla of Maryville will vie with Cunningham and Rogers for kicking honors.

This game will mark the opening contest for the Miners in the M. I. A. A. conference, and if the strength which the Miner's forward wall displayed against the Billikens is again monopolized to stop line plunges, the Teachers will have to resort to an aerial attack. The Bearcats will face a much stronger and heavier team than last year. Although the season is only beginning, this battle will be a hard-fought one which may be a deciding factor in the final outcome of the conference.

The squad will leave Thursday noon and will stop over at Chillicothe Business College for a practice session before journeying on Friday morning. The weights of the two teams are fairly well balanced. Maryville has a slight edge in the backfield. The Miner backs average 161 while the Bears weigh 167.

The probable lineups:

| Miners | Maryville |
|----------|-----------------|
| Nevins | LE Breckenridge |
| Kromka | LT Farrell |
| Koerner | LG Reno |
| Kiburz | C Loos |
| Rogers | RG Rizzo |
| Krueger | RT Kruse |
| Strawhun | RE Walker |

TO THE PARENTS OF OUR STUDENTS:

The aid and inspiration given in the past by the parents of our students meeting with us here on the School of Mine's campus has been such that we are both appreciative of it and wish to continue with a meeting this fall on Saturday, October 19. You may have already received a notice and invitation but, if by chance you have not, I would like to invite parents and friends to visit us on that date. Although this was first started as Dads' Day, because so many mothers were interested in coming also, it is now in fact Parents' Day and mothers are included in the cordial invitation of the faculty and myself.

In addition, it has been found in the past that some parents derive considerable pleasure in meeting the parents of other students as well as our staff and it is hoped that those of you who can attend will profit by doing so.

There will be an opportunity in the morning to see our facilities and to meet the instructors and in the afternoon there is a football game (Central Missouri State Teachers College of Warrensburg) for fifty cents plus the tax. After the game there will be a meeting of the Association for the Advancement of the Missouri School of Mines and a supper or banquet at 6:00 p. m., \$1.00 a plate including the tax.

Sincerely yours,
Wm. R. Chedsey.

New High Reached In MSM Enrollment

Proof that the Missouri School of Mines is gaining in prominence is shown by the record enrollment for this year. The latest figures show a total enrollment of 906, as compared with 850 the same time a year ago, and is the largest number of men ever to be enrolled with the school.

Mr. Hubbard has stated that the enrollment is in every way consistent with the advances made on the campus during the last five years. No specific reason can be given for the unusual enrollment this year. However, several letters received this summer by the Military Department have left the impression that many students are enrolled under the belief that they will be exempt from military service in the draft.

This issue of the MISSOURI MINER is being mailed to the parents of every student in school here, in order to promote interest in Parents Day. This project is being financed jointly by the Student Council and the MINER Board.

Detonators Drill On Dad's Day

The Detonators, crack drill platoon, will give its first exhibition Dad's Day. The unit was organized again this year, and now has a total enrollment of fifty-six men.

Two senior leaders will be chosen Friday morning by the Detonators to command and lead the drills. The juniors and seniors have been busy working out new formations and maneuvers for the Detonators, and it is expected that the unit will even exceed its impressive record of last year.

Miners Clamor For "Wonderin' Soph;" Like Semi-Weekly, Find Reporters

By Bob Fritze and Don Ingerson

Over half the Miners are in favor of two issues of the "Miner" weekly, and all desire the return of last year's feature "Wanderings of a Soph's Mind," according to a poll taken on the campus this week.

Ten per cent of the students of each class were asked for their opinions, and of these fifty-nine per cent liked two issues weekly. Twenty-two per cent favored a return to one issue each week, and nineteen per cent were undecided.

Students who were in favor of two issues weekly gave the reason that news was now more nearly news than history. Those who wished only one stressed the point that one good issue would be better than two poor ones.

Parents of Miners Convene For Annual Parents Day Here Saturday, Oct. 19

October 10, 1940
Rolla, Mo.

Dear Dad and Mom:

I guess the school has already notified you that October 19th is Parent's Day. There is going to be a football game, a banquet and a dance to entertain you so I sure hope you'll come down. I think it would be swell if you'd stay here in Rolla over Saturday night and then we'd have two days together instead of just one.

I also think it would be swell if you'd bring my girl Becky down with you 'cause she would really enjoy the football game and the dance.

Please try to come and bring some cake and cookies with you so I won't be so homesick.

All my love,
Bob.

P. S. Better send me a few dollars as my board, room, tuition and book bills are past due.

Independent Dance Saturday Night

Finishing touches were applied to dance arrangements at the Independent's meeting Tuesday night, and the respective committees were set underway to provide what the Independents promise to be a night to be remembered.

The theme will be a barn dance, and decorations will follow the autumn trend with corn stalks and pumpkins furnishing the principal decorations. All Independents with paid up dues and all fraternity men with dates are extended a welcome. Those attending are asked to dress in barn dance style.

Rene Rasmussen and Henry Kurusz were elected permanent and alternate representatives, respectively, to the Student Council from the Sophomore class.

Warrensburg Football Game and Banquet in Evening are Features

Hundreds of parents of Missouri School of Mines students are expected to convene here in Rolla Saturday, Oct. 19, to be the guests of the school in our annual Parents Day.

Classes are to be held as usual Saturday morning, but students whose parents are in town may be excused in order to show their parents the school in action.

The feature of the afternoon will be the football game between the Miners and Warrensburg Teachers. Following the game the organization of the parents and friends of the School, known as the Association for the Advancement of the Missouri School of Mines and Metallurgy, will hold its annual meeting. It will be a business meeting for the purpose of electing officers.

This organization was organized for what its name implies. It has already been successful in getting through an appropriation for a Chemical Engineering Building; a portion of said appropriation has been released and part of the building is under construction on the campus now.

Director Chersey has expressed the hope that many of the parents will take this opportunity to visit the school and see the conditions under which the students live and work and, at the same time, to meet the parents of other students and the faculty of the school.

The day's program will end with a banquet at the Sinclair Pennant Hotel, and will feature several guest speakers, none having been announced as yet.

The program for the day is as follows:

- 9:00 a. m. Registration, Parker Hall.
- 10:00-12:00 a. m. Inspection of campus, laboratories, and meeting the faculty.
- 12:00-1:30 p. m. Luncheon with sons.
- 1:30 p. m. Football game, Jackling Field, Miners versus Warrensburg.
- 4:30 p. m. Meeting of the Association for the Advancement of M. S. M.
- 6:00 p. m. Parents Day Banquet.

Jane Hall Elected New Coed President

Jane Hall is the new Coed President for the coming year it was decided at a special Co-ed meeting last Thursday. The other new officers for the club are: Mary Frances Strawhun, vice-president and Naomi Asher, secretary-treasurer.

The co-eds are planning a social event around Hallowe'en.

Pete Simond's New Book

A Review, By Rassinier

Peter Simonds, former U. S. Bureau of Mines Fellow, alias Richard Greaves—and perhaps alias Constable Shields of the Royal Canadian Mounted Police—has written a book.

This book, at present on the rental collection shelves of the M. S. M. library, is not the best book that was ever written. . . . regardless of Pete's former M. S. M. status. There is little chance that the edition will sell a million copies.

However, the book is interestingly written. Not that it follows true to the form of all fiction writers. Neither does it have the "lived happily ever after" ending. For that matter, the grammatical construction is weak in some places.

Still, "The Case of Constable Shields" makes interesting Saturday night reading. For a semi-accurate description of life in the "Mounties" there are probably few comparable. Pages are filled with vivid description and colorful conversation.

For those moments in the life of a Miner when light reading is desirable, the book is recommended. Follow Constable Shields in his troubles at H. Q. of the C. I. B.; he's transferred to barracks duty and finally to the rigged Northwest. Then, reach the end of the book with a little better knowledge of the Mounties as they probably really are.

PARKER HALL

Where Parents will gather Oct. 19 before making the rounds of the campus. Contains the Administration offices, the auditorium, school library and biological labs.

Enthusiastic Crowd At Second Free Show

The Rollamo Theatre rocked on its foundations again Tuesday night when the Miners took it over for the second free show of the year. It was said that the management is still looking for the roof which was blown off to the tune of "There's A Tavern in The Town."

A vote of thanks to Casar Berutt, the liberal theater manager, was given by all attending.

Splashes of Ink

From the pen of Ye Ed

YE EDITOR WAS CORNERED by three beautiful coeds the other evening, who, like everyone else, place the blame for all the campus woes on the MISERABLE MINER and its miserable editor. "WE WANT DATES," said the coeds, in an accusing tone; "There are twenty coeds and 900 Miners, and do we get asked to dances? NO. The high school girls are out every night, and imports are hauled in by the trainload. And we sit home and knit."

Thinking they wanted personal action, we thought of the wife and kids, and offered the power of the press to solve the problem. So here goes:

Fellow students, we should seriously balance the benefits of association with our intellectual equals, the coeds (3 hours French, 3 History, 3 Psychology), with the inspiration that we receive from the refreshing innocence (or is it ignorance) of the local high school stuff. Look with more favor upon these more or less permanent landmarks, our coeds. And so on.

How's that, girls.

WHAT CHINAMAN has more streets named after him than any other man in the world? Give up? Well, he's Wun Wey.

COLONEL GORDON'S senior military students are studying military law, and some of the imaginary cases that they study are truly remarkable. For example: A is a sentry, whom B entices from his post by promise of a lil' drink. In the meantime, C enters the building that A was to guard. D is asleep in the building. He hears D Fires at him, but hits E instead. In his dying convulsions, E kicks over a stove, which sets fire to the building. F, who was asleep in the building, runs out, stumbles over some rubbish which G was supposed to have cleaned up the day before, and falls down a well that it was H's responsibility to keep covered up. F drowns. Now who killed F?

IF YOU HAVE HEARD this one before, ust try to stop me. How long will an eight day clock run without winding? You're right. It won't.

THIS WAS WRITTEN under great pressure, with several ink-blackened MINER staff members and impatient printers yelling for an article just long enough to fill up this hole. This just fills up the hole, we hope, and everybody will be happy.

NO, NOT ENOUGH. We needed sixty words, and that was only forty one. Pardon us, folks, but this is 60.

To Our Parents:

This copy of the MISSOURI MINER, the official publication of the students of the Missouri School of Mines, is an invitation from the Miners for you to spend the day with us next Saturday, October 19.

We know that you will enjoy looking over the school and meeting the faculty and your son's classmates. As the parent's of M.S.M. students you will want to see how we carry on down here, many of us so far away from home. The past events of a similar nature were well commented upon and we have every reason to believe that October 19 will be as successful as the rest. Every possible facility will be at your service to insure you a well-spent week end.

We hope you like this MINER, and we'll see you Oct. 19.

A Revival of Enthusiasm

Old graduates were undoubtedly impressed by the amount of enthusiasm exhibited at the recent Missouri School of Mines - St. Louis U. football game, as was everyone else. Whether the increased fervor was due to a reversal in tradition in regards to the outcome of the game or to the cheerleaders is difficult to say, but it certainly was there. Something like this is exactly what has been needed around here for a long time.

Cheering alone won't win a football game, but it will help a lot, and it is an indication that those making the yells are at least interested in what is going on. Everything connected with the exhibition last Friday deserves credit for real school support, the team, the cheerleaders and those in the stands.

Summer Students In Time Battle

CHAMPAIGN - URBANA 111. (ACP) — Summer students at the University of Illinois felt they were being "two-timed" as these rival twin cities waged their "battle of sixty minutes."

The trouble began when Champaign decided to go on daylight saving time. Urbana refused to follow suit.

Hardest hit were U. of I. summer students living in Urbana. Although situated in that town, the university elected to go on daylight saving time with Champaign.

The shift made it necessary for those living off campus in Urbana to arise at 7, Urbana time, to make 9 a. m. Champaign time classes. Students living on campus had little difficulty, however, unless they attended some affair in Urbana which started on that town's time.

Off the Campus

John Brinkmann and Charles Zanzie visited Fayette, the home of Central college, over the week-end in preference to the St. Louis U. football game. What's the attraction boys?

Pi Kappa Alpha

On the last week-end Bob Westwater, Jack Sizer, Louis Hartcorn, and Darwin Bingham spent a very enjoyable week-end in Columbia visiting some dear friends from Stephens College. During their stay there they were guests of the Alpha Nu Chapter of Pi K. A. Also on the same week-end saw four Pi K. A.'s going home for a short stay. These were Bob Oldham and Bob Hanf, na who went to Cenralia, Ill., to visit their parents. Bob Ehrlich and J. D. Jenkins journeyed to Kansas City; also to visit their parents. It is rumored that Bob Ehrlich saw a lot more of Miss Mary Louise Gaines than of his parents but such is love and nothing can stop it. Almost all the rest of the boys in the house visited St. Louis for the football game.

Academy of Science Holds First Meeting

Meeting for the first time this year the Missouri Academy of Science elected their officers for the coming year in the Chemistry Building last night.

John Brodhacker was elected unanimously president of the Academy. Other officers elected are Jack Burst, vice-president; Bill Hubbard, secretary, and Stanford Simons, treasury.

During the meeting a talk on Luminescence was presented by John Brodhacker which was followed by a lecture on Photography by Walter Jenneman.

The following served on committees; Program: W. Hubbard, J. Krall, J. Brodhacker, I. Zimberg, W. Hoereth, W. Jenneman, W. Dames, T. L. Brannick. Refreshments: D. Bingham, W. Clark, J. Lloyd, J. Faser, R. E. Johnson, R. McMath.

Blue Key to Sell New School History

Blue Key, campus service fraternity, will in the near future solicit subscriptions to the history of the School of Mines as written recently by Dr. Claire V. Mann. The present intention of the organization is to solicit all fraternities and their campus organizations and various members of the faculty.

Also under discussion at Blue Key's last meeting was the Student Directory to be issued to the students soon. According to present plans the directory should be ready between the 11th and 15th of October, because of a delay in printing. The directories will be distributed from the Registrar's office.

Dr. Froelich G. Rainey of the University of Alaska has discovered a town-site indicating a non-Eskimo race lived 100 miles above the Arctic circle thousands of years ago.

MINERS TIE BILLIKENS IN HARD FOUGHT BATTLE

Grid Game Ends In Scoreless Tie

Silver and Gold Eleven Unbeaten after Second Tilt of 1940 Season

Out-rushed, out-weighted, and out-passed, the Miners stopped St. Louis U. last Friday night at least five times on touchdown drives, with a resulting score of 0 to 0. It was surely a moral victory for the Miners, although no actual score resulted, for the Engineers have accepted defeat from the Billikens the past eight games.

During the whole course of the game, the Miners were continually defending their goal. The first attempt for St. Louis to score came early in the first period, but a fumble resulted with the Miners holding the ball, and Cunningham kicked the Miners out of danger. Other attempts for the goal mark during the first half were repelled, and excellent kicking by Cunningham and Rogers kept the Billikens at a safe distance.

St. Louis Stopped On 18 Inch Line

A passing attack led by Aussieker of St. Louis, carried the Billikens to the Miner four yard line. With four yards to make in four downs, the St. Louis quarterback called four straight plays over the center of the line. Kromka and Koerner, Miner line-men, contributed greatly to filling the attempted hole, and as a result the Billikens ended up short of the goal. Rogers kicked the Miners out of a hole, and put the St. Louis team back on their own 28. The Billikens again drove into Miner territory, and Weber attempted a field goal, but it fell several yards short of the horizontal bar. The Miners were again forced to kick, and St. Louis took up their passing attack, but two attempts were stopped, and the game ended with the Billikens trying a last desperate pass which failed.

On The Bench

By Bob Nevins

Although we didn't win against St. Louis, everyone seemed quite satisfied with our tie. True our offense didn't get a very good chance to function but there was plenty of defense on display. Of course, the outstanding display was that goal line stand in the 4th quarter. Quite a few people have asked me who was in the lineup at that time so here goes.

At the ends—Joe Strawhun and "Killer" Kane; Ed Kromka and Krueger were holding down the tackle slots while Rogers and Domjanovich were the guards. Mer Kiburz as center and Cook as fullback were backing up the line, while Bruce, "Kozy" and Fullop were watching for passes. They really deserve a lot of credit for their swell play which enabled us to do something no Miner team has done since 1930.

Other things which deserve special mention were:

Cunningham's spectacular kicking until he was injured late in the game. He'll be O. K. for Maryville.

After Durphy was hurt in the 2nd quarter, Kiburz took over the center position and played the rest of the game even though he was "punchy" all during the last half. He wanted to know what the score was when the final gun sounded.

Weber and Aussieker turned in some swell passing for the Bills but in the clutches they seemed to bog down.

Percy Gill and Gale Bullman seemed well satisfied with the teams defensive play but were a bit disappointed with our frequent fumbles and poor blocking.

Saturday most of the team took in the Maryville-Washington game to scout two of our coming opponents. Maryville is weaker without Bill Bernau, but Schwenk's passing is deadly for the Bears.

Something for you folks to remember on Friday night as we play Maryville is that 22 games ago we beat Maryville here in Rolla. Since then they have run

up 21 consecutive victories. We think it would be appropriate if we Miners ended that string! What do you think? I think we will.

New York University's reserve officers' training corps has given basic and advanced courses to 699 students.

"M" CLUB DANCE

Miner Football Squad To Lose Twelve Seniors Upon Graduation In Spring

When the curtain falls on what we have good reason to believe will be a successful football season, twelve of the boys will have played their last football game as Miners. Three backs, four guards, and five ends will see the end of their football service this fall, and we feel they should be commended for the fine worth they've done on the gridiron.

Dick Cunningham

First of these is Captain Cunningham, a native of St. Louis, where he was captain of both the baseball and football teams at Ben Blewett High, and made the all-city football team two years. Besides football he participates in intramural boxing, and was champion in the 165-pound class two years. This is his fourth year of football here.

Cliff Corneau

Cliff Corneau is a back who devoted three years of his time to track at Roosevelt High, St. Louis, but has found time down here to play football two years as well as letter three times in track.

Walter Koziatek

Koziatek twice made the all-city football team from Soldan High in St. Louis, where he also played baseball. This is his third year; he didn't play last year but should be an asset this season. "Kozie" also plays intramural basketball and softball.

Bob Nevins

Bob Nevins has been snagging passes from his end position since he was in high school at Wilmette, Ill. While there, he also played basketball and baseball and lettered in track, but devotes his physical powers only to football here.

Nick Nicola

"Nick" Nicola played basketball at Beaumont High in St. Louis, but changed to football down here. This is his fourth year at end. He plays intramural handball and softball, and pitches horseshoes.

Herb Stockton

Stockton is a senior end who lettered in football in high school and has played two years with

the Miners. He also takes part in intramural volley ball and softball.

Bob Bruce

Bob Bruce of Kansas City is the fifth of our senior ends. He played football, baseball, and basketball in high school and made the all-conference basketball team two years at Oklahoma Military Academy. He made the all-M. I. A. A. basketball team last year, being high scorer in the conference.

Wayne Bennetsen

Bennetsen is a graduate of Cleveland High, St. Louis. This is his fourth year at guard for the Miners. He also participates in intramural boxing, wrestling and softball. Besides being a Tau Beta Pi, an unusual honor for a football man, he is managing editor of the Miner.

Nelson Koerner

Koerner played football at Roosevelt high in St. Louis, and will be playing his fourth year at guard here.

Joe Strawn

Joe Strawn will complete three years of good football also and is one of the Miners best defensive ends. Joe also is active in intramural events, having been heavyweight wrestling champ several years ago. Track comes under his heading also, for he throws the discus a considerable distance. He has played a good brand of basketball also.

Matt Domjanovich

Matt Domjanovich hails from McKinley High in St. Louis, where he starred in football. Matt will complete four years of first rate football here and has won a name for himself in intramural boxing and basketball.

Frank Rogers

Last but not least of the guards is Franklin Rogers, from Maplewood, where he played on the same team as the Mizzou boys, Christman, Cunningham and the Orf twins. Even with such stellar teammates he stood out enough to be named on the all-city and all-district teams. This is his fourth year of football at MSM. He competes in

"Bob" Nevins

Miner end and a real pass-receiver.

Wait 'Til Television (!)

22,800,000 families, research reveals, listen to their radios every day. With the average listening time 5.2 hours per day there are 118,560,000 hours of family listening every day. Since the average number of radio listeners in any family is 3.9, we find there are 461,384,000 man-woman-and-child hours of radio listening in the United States every day. But these figures were calculated before you started reading this, and now, I'll bet, the total is somewhere around 500,000,000, or maybe it's 100,000,000, or maybe it's 461,384,000.

We couldn't find anything to go into this space, either.

intramural boxing, wrestling, softball, horseshoe doubles and volley ball. Last year Rogers was named captain of the all MIAA second team.

That's the dope on the boys who will see their last season end before the dawn of forty-one. We hope that they will help make this a football season to be remembered.

A. I. E. E. Hears Guest Speaker

Mr. H. L. Olesen of the Weston Electric Instrument Company gave a treatise of six general types of indicating instruments at the A. I. E. E. meeting held Wed., Oct. 9.

In general, he gave accounts of how industrial demands affected the design of instruments and explained in detail their working theory. He told of the evolution of auto amateurs as demands for economical manufacture, put them on a mass production basis, and showed how meters are adapted for use in airplanes, battleships, and in other mechanisms which are subject to vibration or shock.

A collection of parts which are used in the make up of meters was shown, among which was an actual circular mil foot of wire which has one-seventh the cross-sectional area of an average size hair, and a nut and bolt with 200 threads per inch, having a hole of .0147 inch diameter drilled in to the bolt lengthwise.

Also, Mr. Olesen displayed an ammeter which has a maximum indication of one-millionth of an ampere, and which showed an appreciable deflection when both terminals were grasped with a person's hands.

Several present at the meeting commented on the technical value of the lecture, and Mr. Olesen's ability to deliver it.

New students at New York's Union Theological Seminary represent 54 universities and colleges.

Iowa State College is ready to supervise training of more than 1,000 technicians for national defense purposes this year.

As a MINER Sees it

Football seasons come and go, it has been a long time since we witnessed a demonstration for our own team like the one that followed our "moral triumph" over St. Louis University. We're off to a fine start fellows; let's continue to support the finest team that we've had in years, and maybe our game with Washington will hold another surprise for St. Louis fans.

It seems that there are at least three freshmen in this school that have a little spunk left. Eater was very effectively whittled down to his normal size last Tuesday after carrying freshman hazing to extremes. Biermann, Doerres, (the senior Min-

ers took care of Doerres) and a few others might take a gentle hint and "lay off" some of their high handed anti-freshman activities. It only takes a few "wise guys" to spoil everything for the entire student body, and if hazing in its present uncontrolled form continues, undoubtedly the faculty will take action and ban it completely.

Pres. "Rip" Fick's latest skit of Dr. "Ten cc" Shrenk performing a demonstration experiment is really a wow. Maybe with a little encouragement he'll present it on the Stunt Night program.

Gene Nevin's crack, "Gee fellows, I've got to go now," almost brought down the roof at the last Independent meeting. Oh well, he'll get over it; he's only a freshman.

Zeke Jennings: "Hurry over to our fraternity house, Doctor, there's a fellow here who has something wrong with his eyes."

Doc Feind: "Must be serious if you wake me up at this time of the night. What's the trouble? Does he see elephants and snakes and things?"

Zeke: "No, sir, that's why I called. The room is full of them and he can't see any."

That Kappa Sig pledge active weiner roast on the banks of the little Piney turned out to be something rare. It seems the boys went all prepared with the right atmosphere, but something went amiss. Bruschke's lantern certainly was out of place, at least. Perhaps the moon was in the wrong quarter. Just ask one of the Kappa Sig boys and watch his face. Maybe you'll solve the whole mystery.

Many Tryouts For MINER Staff

Starting off the year with a bang, the MINER Board's first call for tryouts brought out 90 men. The news staff leads the list with 38 tryouts, followed by the advertising staff with 20 men, while the business staff and circulation staff have 17 tryouts apiece.

The tryouts will be expected to attend regular MINER meetings in their respective departments, and records will be kept of their work. This record of their work will be submitted to the MINER Board Staff next spring when the annual election of new members takes place.

The tryouts are as follows: News Staff — Darwin Bingham, James Bradley, E. Bumps, George Burke, Ray Carmack, P. Desjardins, J. Ferris, R. Fritz, Ed Goetmann, Thomas Gregory, Jim Glover, Wm. Hellwege, D. Ingerson, Clyde Krummel, W. Jenenman, Glarsen, Hartley Locher, Russell Lohmann, H. Manzer, Bill Mengel, Seymour Orlofsky, Ira Parkins, B. Rassiner, C. Patton, K. Roffmann, Catherine Schultz, Virginia Schutlz, John Sproat, D. Stocker, Jim Sullivan, G. Thomas, Peter Vaida, Charles Vogel, E. Vogelsang, G. Wagner, Dave Wicker, John Wilms, J. Zagata.

Advertising Staff — R. Melvin Trudeau, Otto Holz, Jimmie Thomas, Jim Kollmel, Bob Schmidt, Everest Schroll, Bill Clark, Walter Pierson, Lewis Hartearn, William Christman, Fred Martens, Eugene Hamman, James Johnson, Jack Frazer, Jean Lloyd, Elanor Gibson, Bill Higley, Walter Dean, C. Merrell, Harvey Barnett.

Business Staff — J. Jenkins, J. Sizer, Bob Oldham, Bob Ehrlick, Wayne Gollub, Bob Underhill, Joe Lowrey, John Harris, Howard Strangland, Jim Bryant, Bob Fitzpatrick, Enos Key, Lynn Burnett, Louis Bartell, Jim Ferry, Howard Avery, Ray Lieb.

Circulation Staff — B. Landis, Carl Knoebel, Jack Olson, C. Rakestraw, R. Roos, C. Brew, R. Weiss, A. Bush, H. Bosworth, Mike Cantanzaro, S. Bridge, R. Wampler, B. Magee, R. Klorer, L. Wolf, John Krall, R. Kasten.

Dr. H. C. Byrd of the University of Maryland has announced plans for construction of a football stadium to seat 25,000.

Bureau of Mines Begins Research On Manganese

According to a recent news dispatch from Washington, the Bureau of Mines of the U. S. M. campus will soon employ a number of extra men and will receive a grant of approximately \$100,000 for research to produce ways and means of making the United States independent of foreign na-

tions for its manganese supply.

Under study will be ore samples from Cuyana, Minnesota, Arkansas and the Appalachians to determine a method of obtaining an increased supply of a material so valuable to industry. The plan was not ready for release at the time of this printing, but it is believed that a statement will come from the Bureau of Mines officials soon.

A PHILOSOPHICAL MINER LOOKS AT THE MIND

Advices Cultivation Of Little Used Organ

By Otis Banes

If we take the universe as a whole and place ourselves aloft on some other planet, we could look down on the great scheme of things and see how each part has its place. We could watch the marvelous creatures of our "Divine Creator," the soil, the sea, and all living things. Have you ever noted the feathered family, the gracefulness in flight, the skill in nest building, and most pleasant, their exquisite art of song. In the upper strata of this whirling scheme comes the most gifted of all, one who has somewhat control over his destiny, and this creation is known as fellow man.

The controlling power of this supreme gift of all creation is the human mind. If you should fall heir to an enormous sum of lucre, would you not think of the wisest method to manage this most for-

tunate gift? One has a much more precious gift in his mind, and the possibility of using it day after day. All the problems on the surface of this earth could easily be settled if people would think. There would be no warring of nations and destruction of human lives if the minds of men were correctly put to use.

Just as the soil is tilled to grow a large healthy plant, the mind can be activated and enriched. One of the well known elements in the building of one's mind is affection, as was the great mind of Abraham Lincoln, built around affection for the human race. It is often quoted that concentration, sympathy, and curiosity, are marks of a great mind.

The body plays an important part in the development of your mind. If you had a new automobile the last thing you would do is to burn a low grade of gasoline or run it without oil. In like manner you cannot abuse or neglect your body and expect to get

the best use of your mind. Everyone has experienced that while in a state of sickness the lamp of adventure is low and their courage is at ebb tide stage. The mind functions so when the body conditions are thus.

Behind every great achievement, the great bridge that spans a river, and the sturdy airplane that sweeps the skies, there are endless details and plans. We are now living in a precise and orderly world, which requires the secrets of skilled workmanship. The solution of these secrets appear only through the mastery over one's mind.

We are now in an institution of the most fertile field to give the finest and fullest development possible to the human cortex. So by planning your time carefully you can reach any achievement you desire and you will find generous leisure, happy companionship, and relaxation and meditation, which are marks of a well-balanced mind.

Bourchier Injured In Touch Football

Paul Bourchier, intramural boxing star, and former football player, found that touch football is a tough game.

In the game between the Pi K. A's and the Senior independents held Wednesday, Paul received a broken rib and a dislocated shoulder when he dived for the ball.

Theta Tau to Hold Outing

Planning an outing Oct. 15, to commemorate their founding, the national professional engineering fraternity, Theta Tau, held their second meeting of the year in the Metallurgy Building last night.

Also the fraternity decided to send representatives to the Regional Theta Tau Convention which will be held Oct. 19 in Iowa City.

New Geology Prof. Spent Summer On Expedition

On Monday, Sept. 23, Dr. Preston E. Cloud, formerly of Yale University, conducted classes as the newest addition to the Geology Dept. faculty.

At Yale, where Dr. Cloud received the doctorate degree this year, he was curator of Prof. Chas. Schuchert's noted brachiopod collection. In this capacity, Dr. Cloud made several prolonged trips, collecting specimen and bringing the entire collection up to date.

During the past summer, Dr. Cloud was a member of the link Washburn expedition to Victoria Id. in the capacity of stratigrapher. Dr. Cloud worked on the Pleistocene deposits of this heretofore unworked region.

Victoria Island, which is the largest land mass north of Canada, was entered by eskimo boat. The expedition went by plane into north Canada. On the return trip no passenger boats were available and in order to return before the Arctic winter set in, the expedition chose to sign on with the crew of one of the Hudson Bay freighters. Bink Washburn spent the return trip as assistant to the engineer, his wife polishing engine-room brass; Dr. Cloud stowed several hundred tons of 210 dollar a-ton coal.

WPA Executive: "If we don't figure out a way to spend one hundred and twenty million dollars, we lose our jobs."

His secretary: "How about a bridge over the Mississippi—lengthwise?"

Harold Wampler New M Club Head

Harold Wampler, senior met and basketball star is the new president of the rapidly rising "M" Club. He succeeds Bob Nevins, footballer, as leader of the lettermen's organization. Frank Rogers replaces Cliff Corneau in the vice-president's chair, while Bill Nesley and Charles Clarkson are the new secretary and treasurer, respectively. Their positions were formerly held down by Wampler and Nick Nicola.

Five new members are expected to be taken into the club before the initiation on October 25th. The eligible men are Ralph Eads, Keith Cook, Joe Van Pool, Leo Spinner and Thomas Pierce.

Chief business of the meeting, aside from the election, was the dance sponsored by the club on October 19th. Tickets were distributed to the members and pre-sale tickets may be purchased from members for 60c.

Ambulance Drive Begun In Colleges

NEW YORK, Oct. 10—(Special)—A drive in schools and colleges throughout the nation to enable the youth of America to dispatch their own ambulance fleet to war-torn Britain has been launched by the British-American Ambulance Corps, William V. C. Rpxton, president, announced today.

Each institution will carry on an individual campaign to raise from its own student body the \$1350 needed to purchase an ambulance, which will bear the school name. Each also will establish its own committee to handle the drive.

Richard E. Wilbur, Yale '38, who is national chairman of the campaign at the headquarters of British-American Ambulance Corps, at 420 Lexington Avenue, said today that initial responses from the undergraduate councils of virtually all schools approached indicated overwhelming enthusiasm for the drive.

"The youth of America can be expected to respond quickly to Great Britain's immediate need for over 1000 ambulances," Wilbur said. "I have just returned from meetings undergraduate councils in several of the larger colleges. They have indicated overwhelming enthusiasm over this opportunity to 'do their bit' to help fill this critical need of a country fighting to defend the only concept of human decency that it and America can live by."

The new college and school division is expected to play an important part in British-American Ambulance Corps' intensified Fall and winter drive for ambulances.

Checks should be made out to Wilton Pierce, treasurer, 420 Lexington Avenue, New York City.

We couldn't find anything to go into this space, either.
